**Challenge:** Trigger extenders for ps4

**Brief:**

Need trigger extensions for ps4. These should allow using the triggers from the sides or other angles depending on design.

Here's a fantastic example of r Xbox.

**Guidelines:**

- Majority 3d printable or easily sourced materials (rubber band/paperclip etc)
- Non destructive - clip on
- Bonus if it looks good
- Final design MUST be released free online

**Existing mods for other controllers - feel free to mod or extend these**
